## DETAILED ACTION

### *Election/Restrictions*

1. Upon initial review of the claims it appears that claims 1-43 differ in subject matter and therefore require a different search. In accordance with this a restriction is deemed proper.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-23, drawn to configuration, classified in class 715, subclass 735.
  - II. Claims 24-30 and 42, drawn to information provided being determined by a desired operation, classified in class 715, subclass 708.
  - III. Claims 31-41 and 43, drawn to data transfer, classified in class 715, subclass 748.
3. Inventions Groups I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, each has a separate, stand alone utility: Group I receives signals and switches between elements based on the signals; Group II searches received data, adds attributes to the data, and displays the data as an object; and, Group III stores received data, and displays the data as an object along with a pointer.

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

4. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Edward Kmett on 6/22/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be

accompanied by a diligently filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

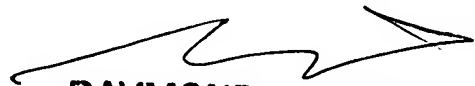

***Inquires***
